

Empathy Map Canvas

THINK & FEEL?

What kind of Diseases would be identified?

What fertilizers would we recommend?

How to train model for accuracy

SEE?

There are lot of opportunites in AI/ML Field.

Will help farmers a lot.

People would get good quality products.

SAY & DO?

Study courses regarding machine learning.

Refer research papers.

Learn Python and Flask.

HEAR?

Farmers facing a tough time in identifying the plant diseases.

Need to access the correct fertilizers that help in better growth of crops

PAINS

New concepts to learn.
Restricted time.

GAINS

Understanding Machine Learning techniques.
Knowledge about Agile Methodologies.
Deploying Web Application.
